2. What's the progress on each functionality? Pull requests approval

- **In the first pull request, it is reviewed all the files will upload correctly.**
- **We add protection to the main branch, and it is necessary create a new branch to does pull request.**

https://github.com/NicolasRogersV/Ravenclaw_challenges

3. Web application design: how the user is going to interact with your solution?

The app present errors. We continue work to fix them and publish the app for the users give us feed back. But, we want that users can interact with a friendly interface, that helps to understad better the app.
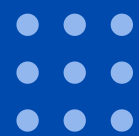

4. Challenges

Fix the erros during the development

Take into account, most of the ideas of the group.

Review the compatibility with library Pandas

stablish a good work schedule for each member of the team

Time for work in the development of the app

understand the topic almost perfectly to give the user a good experience

Create a friendly interface to the user
